September 2017 Scrap & Alloy Surcharge Announcement

To all of our valued customers,

The following surcharges are in effect for all shipments in the month of September 2017. Unless otherwise noted, surcharges will be added at time of shipment. This is a list of the most common grades. Please inquire for those not listed.

Grade of Steel	Size Range	Cwt (100 lbs)
4140/50HT	6" Rd & Up	\$15.76
10V45	6" Rd & Up	\$14.50
1045/50	6" Rd & Up	\$13.63
4140/50HT	Under 6" Rd	\$12.57
1018-1050	Under 6" Rd	\$10.46
1060 Linear Shafting	All	\$10.02

Alloy surcharges are additional charges which we pay for raw materials from our suppliers, calculated on the basis of scrap steel & alloy elements. This is added on top of the base price for steel. The thought behind the introduction of surcharges was to keep the volatile up & down costs of raw materials transparent while keeping base prices stable.

Please contact Northlake customer service or sales at (888) 278-4682 for any questions or grades that aren't listed above.

We appreciate your continued business and support.
